

know my patch

live with complexity

no time to bang my head against unyielding doors

I can't do this by myself and I'd be crazy to try

find a friend

make common ground

know when to push and when to hold back

bite off only what I can chew

what I lack in clout I can achieve through wisdom

stay out of my comfort zone

assume nothing

less can mean more

get the interest of the best in our professions

follow the energy

senior managers need solutions not problems

there's something I need to do to do first

the shortest distance is not always a straight line

design relevance, ensure impact - finesse sustainability
